

505P-7 Miter Saw Protractor

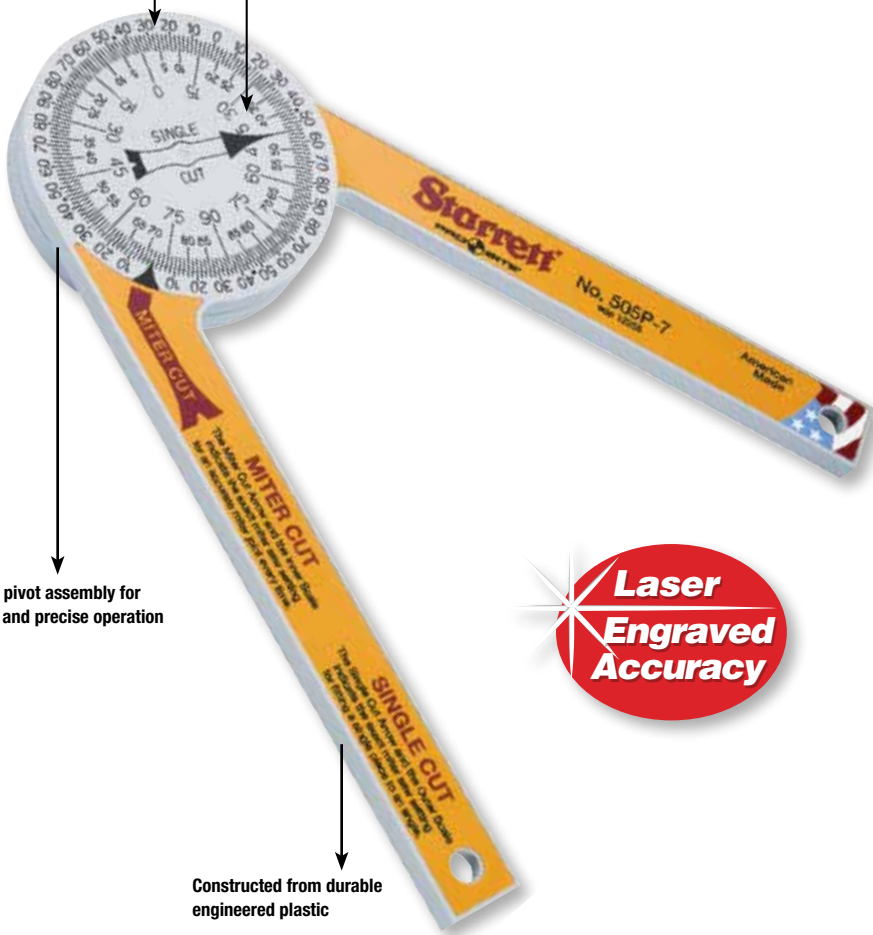

Direct read from the work to your miter saw!

The 505 ProSite® Protractor family has been expanded to include the new 505P-7. Constructed from durable engineered plastic and economically priced, the 505P-7 eliminates calculations, reduces errors and provides greater accuracy for miter cuts. Simply set your saw to the angle shown on the protractor. Upside down or backwards, the reading is always correct. 505 Protractors are ideal for carpentry, all building trades and invaluable for home use.

Two easy to use scales:

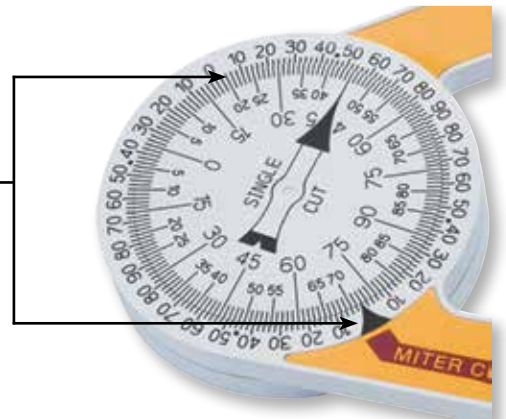

Single Cut: The center arrow points to the angle on the outer scale

Miter Cut: The arrow on the handle points to the angle on the inner scale

Smooth pivot assembly for smooth and precise operation

Constructed from durable engineered plastic
